

MYBE

AVATAR LEARNER JOURNEY[©]

ABOUT MYBE AWARDS

Mybe Awards are a vocational training provider who work predominantly with underserved communities deploying innovative methods in niche ways, not typically found in mainstream learning and skills.

UFI VOCTECH TRUST

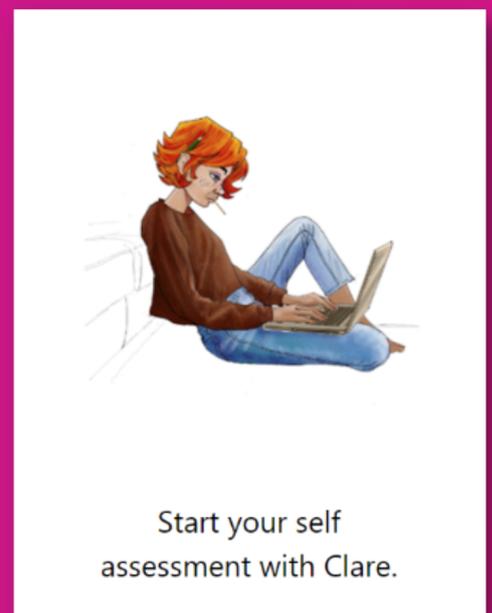

Ufi VocTech Trust is a significant grant-funding body with a focus on delivering an increase in the scale of adult vocational learning and skills, primarily through digital technology.

AVATAR LEARNER JOURNEY

With the support of UFI, Mybe Awards have developed the Avatar Learner Journey for underserved learners. An online self-assessment tool to identify learners' support needs, potentials, capabilities and occupational interests, generating an achievable, personalised learning plan.

WHY AVATARS?

Avatars are a unique component to the learning platform and are a graphical representation of an underserved learner's persona in this learner journey. The avatar method cancels out the need to repeat their stories multiple times to learning providers, increasing motivation to learn and the capacity to achieve.

TARGET LEARNERS

The Avatar Learner Journey is here to help anyone with learning support needs. Anyone feeling underserved and effectively penalised for not fitting easily into mainstream learning.

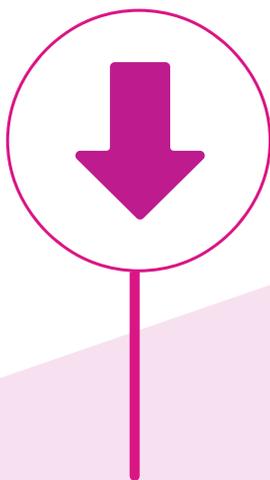

HOW CAN YOU HELP?

Our aim is to reach as many underserved learners as possible, but we can't do this alone. We hope to collaborate with organisations, like yours, who can direct learners to this opportunity that can lead to a brighter future.

HOW IT WORKS

The Avatar Learner Journey will be accessible via app and website, available 24/7 at the learners own pace and ensures learners receive personalised learner support throughout their journey. You can signpost or refer learners to our [website](#) to sign up.

Read our step-by-step guide of the Avatar Learner Journey below!

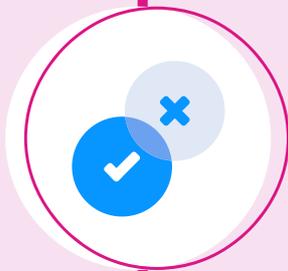

1

The learner begins by listening to the stories of previous learners who have been developed into **avatars**. The learner then chooses the avatar that best represents themselves.

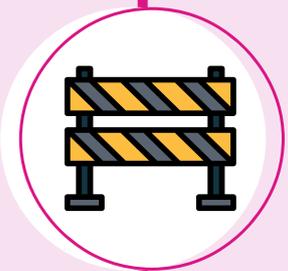

2

The learner identifies their **characteristics**, using their chosen avatar as a starting point. Characteristics include health, education, home circumstances, learning difficulties and more. The learner may be directed to extra support if needed.

3

The learner determines if they are **ready to progress** and move to the next stage. If the learner is not ready or has mixed feelings, they are directed to a chatbot to resolve the difficulty. This may include an engagement with MYBE staff.

4

When the learner is ready to progress, they are given **8 barriers** and determine their intensity with a SA best fit tool to identify their personal support level needs.

Barriers include: emotional, health, coping, education & training, substances, relationship difficulties, behaviour problems and community circumstances.

5

The learner determines the personalised level and type of learner **support** framework they need to continue to progress toward a brighter future.

6

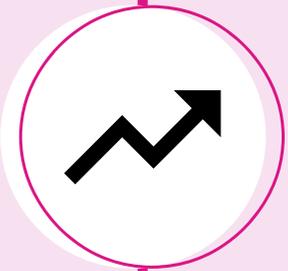

The learner is given **8 potentials** and determines their prevalence with a best fit tool to identify their personal strengths and aptitudes.

Potentials include: work ethic, positive attitude, leadership, digital skills, self-management, knowledge, customer service and job-related skills.

7

The avatar self-assessment balances the learner's personalised needs and potentials and calculates the learner's **capability level** to manage learning and development.

8

The learner's capability for **progression** is determined as the starting point for one of 3 vocational levels: Pre Level 2, Level 2 or Level 3 learning and development.

9

The learner selects their **occupational interests** to inform a personalised vocational road map toward a brighter future.

10

The individualised **Learner Plan** and **Objectives** are generated.

11

The learner is **ready to begin** their learning journey with personalised support and will be directed to the online learning platform to enrol and begin their journey to a brighter future.
